PROFESSIONAL SUMMARY

Results-driven Full Stack Developer with 3.3 years of experience building scalable and responsive web applications using React.js, Node.js, Express.js, JavaScript, TypeScript, and REST APIs. Experienced in developing reusable frontend components, secure backend APIs, database integration with MySQL and MongoDB, and application performance optimization. Contributed to applications supporting 300,000+ users and 250+ US market domains, with a strong focus on maintainability, reliability, and user experience.

TECHNICAL SKILLS

Frontend: React.js, Redux Toolkit, TypeScript, JavaScript (ES6+), Angular, HTML5, CSS3, Tailwind CSS, Bootstrap, Micro Frontends
State Management: Redux, Redux Toolkit, Context API
UI/Styling: CSS Grid, Flexbox, Responsive Web Design, Mobile-First Development
Backend & Databases: Node.js, Express.js, PHP (Core), MySQL, MongoDB, RESTful APIs, GraphQL, JWT Authentication, Microservices
Testing & Methodologies: Jest, Unit Testing, Agile, Scrum, CI/CD Pipelines
Messaging & Real-Time: Apache Kafka, WebSocket
Tools & Platforms: Git, GitHub, VS Code, Postman, npm, Webpack, Chrome DevTools, Vercel, AWS (Basics)
AI Development Tools: Claude AI, Cursor AI, ChatGPT, GitHub Copilot, Prompt Engineering
Other Concepts: JSON, AJAX, Axios, CORS, API Security, Performance Optimization

WORK EXPERIENCE

Full Stack Developer Rifluxyss Software PVT LTD - Chennai
PalmAgent – Real Estate Net Sheet & Closing Cost Application Jun 2022 - Sep 2025

- Developed scalable, modular React applications using reusable components, significantly improving code maintainability and team development efficiency.
- Integrated robust REST APIs using Axios and Redux Toolkit for seamless data handling and centralized state management.
- Optimized React component lifecycles to reduce unnecessary re-renders, measurably enhancing frontend performance and responsiveness.
- Contributed directly to a single scalable React codebase supporting 250+ US market domains and 300,000+ users.
- Engineered iframe-ready closing cost calculators designed for seamless embedding into external partner websites without requiring user login.
- Designed and developed secure, scalable RESTful APIs utilizing Node.js and Express.js to power frontend features.
- Implemented end-to-end CRUD operations, JSON Web Token (JWT) authentication, robust input validation, custom middleware, and centralized error handling.
- Managed relational and non-relational databases including MySQL and MongoDB, focusing on optimal schema design, complex query writing, and performance tuning.
- Integrated third-party APIs while enforcing secure CORS policies, environment variable management, and comprehensive API security standards.

EDUCATION

EGS Pillay Engineering College | 2019 - 2021
Master of Computer Application
- GPA: 7.2

Jamal Mohammed College | 2016 - 2019
Bachelor of Computer Application
- GPA: 6.8
